TRANQUILITY—dark lavender .....	.35		
TRIPTYCH—large yellow .....	18.00		
TYRIAN BEAUTY—purple self .....	10.00		

---

\* Starred varieties—Tobie introductions.

We consider it important for customers to see the irises in bloom before ordering, as the variations in tone and carriage are very great.

The bearded iris should have sun much of the day and good drainage. The rhizomes should be planted just under the surface of the soil.

We replant our iris in the months of July and August—the earlier the better. They should be well rooted in the soil before the arrival of early frosts.

We will make up collections for beginners for one dollar or more.
